Summary

Flutter developer with 2+ years of commercial experience: medtech, culture, an AI service, booking and delivery. I start a feature from architecture and module boundaries, then the network layer, caching, maps and realtime. I ship store builds myself and take products all the way to production: Vue and Three.js websites, native Swift, a Python and Node backend, a VPS behind nginx.

The route

Aug - Nov 2026 · 4 mo

Neiro Peiro 1

Flutter / Full-stack Developer · Saint Petersburg · AI service

A Telegram Mini App for an AI bot: client, backend, admin and deploy - all mine.

- A Flutter Web client on WebAssembly: generation studio, LLM chat, trends feed, payments
- A Python bridge over the bot's code: 17 neural networks, prices and charging by its rules, Telegram Stars and FreeKassa
- A Node server and web admin: roles, analytics, broadcasts, bot clones
- Cold start on 4G 45% lighter (5.3 → 2.9 MB) with no external requests
- Deploy on a VPS: nginx, Cloudflare, supervisor and systemd, server hardening; about 250 tests

Aug 2026 - now

Freelance 2

Web Developer (Vue / Vite / Three.js) · Remote · turnkey websites

Turnkey websites and web apps: from design and 3D to the domain and auto-deploy. I work with clients directly.

- dirigible.community: moved an NGO site off Craftum onto my own Python generator, design system, build validator, redirects
- annasilni.com (Tilda): audit, 9 pages made responsive at 8 widths with zero issues, an 8-page English version
- ruAI: 7 landing variants with WebGL and three.js, a streaming chat, card, SBP and SberPay checkout

Lines

1 Mobile

Flutter · Dart · Clean Architecture · BLoC / Cubit · MobX · MVVM · GetIt · GoRouter · AutoRoute · Navigator 2.0 · Drift · Hive · secure_storage · flutter_map · Rive / Lottie · Local notifications · Isolates · DevTools · intl / l10n · sembast · Flutter Web / Wasm · Geolocation

2 Web

Vue 3 · TypeScript · Vite · Pinia · Three.js · WebGL · Canvas · SVG animation · Tailwind · Vitest · Telegram Mini Apps

3 Native

Swift · SwiftUI · AppKit · AVFoundation · ExtensionKit · Kotlin · Platform channels

- Flower Cup, Frontend Metro, the Budini concept: procedural 3D, a textbook with 165 tasks, a 3D scroll-video
- Deploy to GitHub Pages and a VPS behind nginx, CI/CD on GitHub Actions

Jan - May 2026
5 mo

CSiGN 1

Flutter Developer · Saint Petersburg · culture

Q-Story: a guide to historical places. The only mobile developer - took it to v1.0 and got rid of its own server.

- Designed the client from scratch: feature-based Clean Architecture, MobX, GetIt, GoRouter
- Moved the app off its own backend onto 6 open databases: parallel requests, caching, duplicate merging
- A map, background route tracking, finding a place with a compass and geofence check-in
- Cold start about 30% faster by splitting dependencies and loading them on demand
- About 340 tests, CI and a signed 1.0 release on GitHub Actions

Dec 2025 - May 2026
6 mo

Xouston 1

Flutter Developer · Medtech · social care

An app for cognitive training for elderly users.

- Moved game mechanics from WebView into native Flutter
- Water balance, recipe suggestions, AI and analytics
- Deferred startup: 50% faster launch; caching: up to +30% performance
- Legacy refactoring without stopping the product, code reviews, two-week sprints
- UI for a 60+ audience: large elements, simple navigation, clear feedback

May - Oct 2024
6 mo

Arys 5

Flutter Developer · Petropavlovsk · beauty

Built a barbershop booking app with three roles on my own.

- Three roles with permissions on the client and in Firestore rules
- Booking with a realtime schedule: no double booking of a slot
- Firebase: Auth, Firestore, FCM notifications; 20%+ fewer database reads
- Merged the client and barber apps, split out the admin; CI/CD and a QR app download

Oct 2023 - Mar 2024
6 mo

FOODY 1

Junior Flutter Developer · Astana · food delivery

New modules for a delivery app inside an existing codebase.

- Search with debounce that drops stale responses
- 10 screens from Figma on reusable components, adaptive to any device
- Fixed critical bugs - crash-free sessions up 40%

Jun - Sep 2023
4 mo

Startup 1

Flutter Intern · Petropavlovsk · logistics

My first real Flutter tasks: where the line begins.

- Deep Links straight into the right sections
- An ad-banner system
- All screens built from Figma

4 Deploy

Git · GitHub Actions · Docker · nginx · VPS · TLS · GitHub Pages · Fastlane · App Store / Google Play · DMG releases · Cloudflare · systemd / supervisor · ufw / fail2ban

5 Backend

Firebase Auth · Firestore · FCM · Crashlytics · Supabase · Python · Node.js · SQL / MySQL · SQLite · REST · SSE · Dio + Retrofit · WebSockets · json_serializable · freezed · Talker

Education

ITMO, Applied Informatics: mobile & network technologies (BSc, 2029)

Yandex Cloud Academy: DevOps and cloud

Languages

Russian - native

English - B2

Work format

Full-time, part-time or project work

remote, hybrid or on-site in Saint Petersburg

open to relocating to Moscow

self-employed, can work under contract

work permit for Russia and Kazakhstan

Stations off the route

1 5 2026

KORST

Two-person startup · Flutter client

A service marketplace with no middleman: listings, responses, a built-in realtime messenger and ratings. I wrote the whole Flutter client.

Flutter · MobX · GetIt · GoRouter · Dio · WebSockets · Hive · workmanager

`gh/undemorbe/KORST-project`

1 5 4 2026

PORA

Pet project · in progress

A family shopping list that pulls ingredients from a recipe link, removes duplicates and hints when it's time to restock.

Flutter · MobX · GetIt · AutoRoute · Dio + Retrofit · Hive · FCM · WebSockets

`gh/undemorbe/PORA`

3 4 2026

Wallpap

Open source · macOS

Video and photo wallpapers for macOS 26 Tahoe and 27 using the system itself: no background processes, no battery drain.

0 background processes: macOS plays the wallpaper itself

Swift · SwiftUI · AppKit · AVFoundation · ExtensionKit · GitHub Actions

`gh/undemorbe/wallpap`

2 4 2026

ruAI

In progress · live demo

The frontend of a Russian-language AI chat without a VPN: 7 landing variants, a streaming chat, plans and checkout.

7 landing variants - from a shader to 14,000 particles

Vue 3 · TypeScript · Vite · Pinia · Three.js · Vitest · GitHub Actions

`undemorbe.github.io/ruAI` `gh/undemorbe/ruAI`

2 4 2026

Frontend Metro

Learning site · live

A frontend textbook drawn as a metro map: HTML, CSS, JavaScript, tooling and Vue. 51 lessons with live examples and 165 tasks checked right in the browser.

165 tasks auto-checked in the browser

Vue 3 · Vite · JavaScript · Markdown · iframe sandbox · GitHub Actions

`undemorbe.github.io/frontend-roadmap`
`gh/undemorbe/frontend-roadmap`

2 4 2026

Flower Cup

Website · live

An eco-startup site: bouquets in biodegradable cups with seeds inside. Spin the 3D cup and "plant" it to watch a sprout grow.

Vue 3 · Vite · Three.js · SVG · Fontsource · GitHub Pages

`undemorbe.github.io/flower-cup` `gh/undemorbe/flower-cup`

2 4 2026

Budini Coffee

Concept · live

A concept site for Budini coffee shop: a Three.js scroll-video and a menu with a drink builder where the cup fills up before your eyes.

450 3D frames scrubbed by scroll

Vue 3 · Vite · Three.js · Canvas · Vue Router · GitHub Actions

`undemorbe.github.io/budini-coffee`
`gh/undemorbe/budini-coffee`

1 2025

Hornet

Open source

An image gallery over several APIs: tag search, custom transitions, a smooth feed.

Flutter · BLoC / Cubit · GoRouter · Dio · Hive · GetIt

`gh/undemorbe/hornet`
