SUMMARY

Flutter developer since 2023: from an intern to designing client architecture from scratch. I build iOS and Android apps from design to release, plus what surrounds them - 3D websites, native Swift and deployment to my own server. I measure results in the profiler, not in promises.

6	−50%	4
teams and clients since 2023	app launch time at Xouston	projects live right now

EXPERIENCE

dirigible.community

2026

Web Developer · Remote · NGO

A new site for the Dirigible NGO and a move off a site builder to my own stack.

- Wrote a Python static generator and the "knitted fabric" design system
- Moved the content off Craftum and set up redirects
- Set up auto-deploy and build validation

Xouston

Dec 2025 - May 2026 · 6 mo

Flutter Developer · Freelance · medtech

An app for cognitive training for elderly users.

- Moved game mechanics from WebView into native Flutter
- Water balance, recipe suggestions, AI and analytics
- Deferred startup: 50% faster launch; caching: up to +30% performance
- Legacy refactoring, code reviews, Agile and direct client contact

CSiGN

Sep - Dec 2025 · 4 mo

Flutter Developer · Saint Petersburg · culture

Q-Story: history and walking routes via QR and a map. The client architecture is mine.

- Designed the client architecture: Clean Architecture, feature-based
- QR, geolocation, maps and walking routes, wired to the backend API
- Content without scanning: just being near the marker is enough
- Cold start about 30% faster by splitting dependencies and loading them on demand

Arys

May - Oct 2024 · 6 mo

Flutter Developer · Petropavlovsk · beauty

Built a barbershop booking app with three roles on my own.

- Client, barber and admin with permission separation
- Booking with service selection and a realtime schedule
- Firebase (Auth, Firestore), database optimised by over 20%
- Merged the client and barber apps, moved the admin panel out on its own

SKILLS

Mobile

Flutter, Dart, Clean Architecture, BLoC / Cubit, MobX, MVVM, GetIt, GoRouter, AutoRoute, Navigator 2.0, Drift, Hive, secure_storage, flutter_map, Rive / Lottie, Local notifications, Isolates, DevTools, intl / l10n

Web

Vue 3, TypeScript, Vite, Three.js, Canvas, SVG animation, Tailwind, Telegram Mini Apps

Native

Swift, SwiftUI, AppKit, AVFoundation, ExtensionKit, Kotlin, Platform channels

Deploy

Git, GitHub Actions, Docker, nginx, VPS, TLS, GitHub Pages, Fastlane, App Store / Google Play, DMG releases

Backend

Firebase Auth, Firestore, FCM, Crashlytics, Supabase, REST, Dio + Retrofit, WebSockets, json_serializable, freezed, Talker

EDUCATION

ITMO, Applied Informatics: mobile & network technologies (BSc, 2029)

LANGUAGES

Russian - native
English - B2

WORK FORMAT

Full-time, part-time or project work
remote, hybrid or on-site in Saint Petersburg
work permit for Russia and Kazakhstan

Updated: November 2026

Freelance

Oct 2023 - Mar 2024 · 6 mo

Junior Flutter Developer · Astana · delivery

New modules for a delivery app inside an existing codebase.

- Search with debounce and concurrency handling
- 10 screens from Figma mockups
- Fixed key bugs - stability up 40%

SKian

Jun - Aug 2023 · 3 mo

Flutter Intern · Petropavlovsk · logistics

My first real Flutter tasks: where the line begins.

- Deep Links straight into the right sections
- An ad-banner system
- UI from Figma and async flows

PROJECTS

KORST

Two-person startup · Flutter client · 2026 — gh/undemorbe/KORST-project

A service marketplace with no middleman: listings, responses, a built-in realtime messenger and ratings. I wrote the whole Flutter client.

Flutter · MobX · GetIt · GoRouter · Dio · WebSockets · Hive · workmanager

PORA

Pet project · in progress · 2026 — gh/undemorbe/PORA

A family shopping list that pulls ingredients from a recipe link, removes duplicates and hints when it's time to restock.

Flutter · MobX · GetIt · AutoRoute · Dio + Retrofit · Hive · FCM · WebSockets

Wallpap

Open source · macOS · 2026 — gh/undemorbe/wallpap

Video and photo wallpapers for macOS 26 Tahoe and 27 using the system itself: no background processes, no battery drain.

Swift · SwiftUI · AppKit · AVFoundation · ExtensionKit · GitHub Actions

Budini Coffee

Website · live · 2026 — undemorbe.github.io/budini-coffee

A site for Budini coffee shop: a Three.js scroll-video and a menu with a drink builder where the cup fills up before your eyes.

Vue 3 · Vite · Three.js · Canvas · Vue Router · GitHub Actions

Flower Cup

Website · live · 2026 — undemorbe.github.io/flower-cup

An eco-startup site: bouquets in biodegradable cups with seeds inside. Spin the 3D cup and "plant" it to watch a sprout grow.

Vue 3 · Vite · Three.js · SVG · Fontsource · GitHub Pages

Hornet

Open source · 2025 — gh/undemorbe/hornet

An image gallery over several APIs: tag search, custom transitions, a smooth feed.

Flutter · BLoC / Cubit · GoRouter · Dio · Hive · GetIt

Every project with a breakdown and code - in the portfolio:
undemorbe.github.io/Portfolio
